

How to be more employable in the private sector

Topic area:	Career development
Format:	Online or in-house workshop
Workload:	4 webinars of 2.5 h each = 2 workshop days
Trainer:	David Giltner
Target group:	PhD students and postdocs

Most of us who complete a PhD in a science discipline will end up working outside academia. Are you wondering what working in the private sector is really like? How do you find these jobs? Do you feel confident that you can impress an industry hiring manager when

you describe the highly specialised research project you have just spent years pursuing? And what kinds of jobs can a scientist get in a company anyway? This workshop helps you with these questions and many more about the exciting world that awaits scientists in the private sector!

How is industry different from academia? - Addressing the cultural differences - What will my main challenges be in that role?	Can a scientist build a rewarding career in industry? - Career options for scientists in industry - Will I enjoy working in industry?
How to design your own career path in the private sector - What strengths make me valuable in industry? - What's the best way to find a job?	Impressing an industry manager - How can I describe my PhD work so they see my value? - How can I sound more industry savvy in an interview?
Industry topics not taught in STEM - How are projects run in industry? - Finance - The language of business - Working with customers	Overcoming the job search challenges - I was perfect for that job! Why didn't I hear back? - How do I answer those tricky interview questions? - Can a shy person network effectively?

For larger audiences, the workshop content can be delivered as an **interactive talk**.

This seminar can be tailored for **long-term postdocs** who couldn't secure a professorship and face difficulties transitioning to the private sector. Special emphasis is placed on redefining your skill set and career options given that specific background.
